

One platform for quoting, jobs, stock, fleet, and compliance. Built around how you already work.

Nexus brings quoting, job execution, labour, stock, fleet and compliance into a single system. No forced structure, no unused features. You switch on the modules that solve today's biggest priorities, and expand when you're ready.

One Connected Platform

A quote becomes a job card. A job card becomes a timesheet and a stock reservation. Costs and compliance records are tracked automatically, in the cloud, from a single point, not six different tools.

Built Around You

Nexus configures to how your team already works, not the other way around. You switch on the modules that solve today's biggest priority, and expand only when you're ready to.

Ready For The Field

Geo-located sign-on, NFC-based tool issue and mobile-first job cards mean Nexus works on site, not just at a desk, with client and technician portals built in.

COMMON STARTING POINTS

Quoting

Job Cards

Stock Control

Fleet Management

Compliance & Certification

Time Sheets

Payroll

Warehousing

Nexus isn't an add-on for your business. It's the platform your business runs on.

Start with the modules that matter most today. Everything else gets easier as a result.

Traceability

Every quote, job, hour, part and certificate logged and auditable, automatically.

Scalability

Start with the module that matters most now. Add more as you grow.

Speed

Enter information once. It populates every relevant form automatically.

Accountability

Tools, PPE, labour and vehicle usage tied to a named person, every time.

See Nexus against your own numbers.

Book a walkthrough tailored to your business.

MODULAR BY DESIGN

Built module by module. **Only what you need.**

Nexxus isn't sold as one fixed package. It's a set of modules across four areas of the business, each one built to connect natively to the others, so you can start small and expand as new priorities come up.

SALES & CLIENT ENGAGEMENT

Quoting, pipeline and client management

- Centralised quoting with automatic revision control
- Sales rep and pipeline visibility for leadership
- SLA and client-specific cost tracking

FIELD OPERATIONS & WORKFORCE

Job cards, timesheets and labour

- Digital job cards with geo-located sign-on
- Timesheets tied directly to jobs and quotes
- Multi-branch labour and payroll consolidation

ASSETS, TOOLS & STOCK

Fleet, warehousing and equipment

- Centralised quoting with automatic revision control
- Sales rep and pipeline visibility for leadership
- SLA and client-specific cost tracking

COMPLIANCE & INSIGHT

Reporting, dashboards and admin

- One-click access to certificates and compliance records
- Real-time dashboards on performance and productivity
- Role-based access for staff and client data

Why teams choose Nexxus.

- **100% Traceability**
Every quote, job, hour and part logged automatically
- **Fully Customisable**
Modules switch on around your existing process
- **Modular Pricing**
Pay for what you use, expand as you need
- **Technical Support**
Fast, dedicated developer support behind every rollout

Step 1: Discover

We map what happens today, from quoting to invoicing, and find where to start.

Step 2: Configure

Nexxus is configured around your existing process, not the other way around.

Step 3: Expand

Switch on further modules as new priorities surface and the business grows.
